Browser Explanation

- A browser is software that is used to view pages on the World Wide Web. These pages can include text, images, audio, and video. Pointing and clicking with a mouse on graphics and highlighted words allows you to move from page to page. If you have been following this tutorial, you are already doing this!
- Web pages are not in any order. Later on in this tutorial, you will learn how to use a browser to access a Web page and how to search for Web sites.
- Netscape and Internet Explorer are currently the most common browsers for the Web. Many Internet Service Providers also provide software to access the Web.

We will go into some detail regarding Internet Explorer - which is used in this classroom - in just a few minutes.
